

Bachy Soletanche Singapore is a wholly-owned subsidiary of the Soletanche Bachy group of companies, the world's largest geotechnical engineering group employing over 9,000 permanent staff comprising 60 nationalities. Drawing on the group's network of more than 1,000 engineers and managers and projects executed in over 100 countries, Bachy Soletanche Singapore provides clients with the full range of the techniques and services of an internationally renowned specialist.

Bachy Soletanche Singapore Pte Ltd has been providing innovative geotechnical and foundation engineering solutions in Singapore since the mid 1970s. As a leader in the industry our expertise successfully delivers technically challenging projects. The company was incorporated in 1982, and has been involved in the development and construction of Singapore's Mass Rapid Transit (MRT) from its earliest phases to date. The company diversified into geotechnical and foundation works for the private sector on major projects such as SUNTEC and Bugis Junction while continuing to participate in public sector construction projects such as Central Ministries Building and the New Supreme Court.

Singapore is the regional office for the group's activities in the Asia Pacific Region.

We are looking for Fresh graduates with aspirations to work with us for a long term career development and growth prospects.

Requirements

- 1) 1 to 2 years experience in civil and structural works with exposure to Microstation and AutoCad are needed.
- 2) Fresh graduates with Microstation experience are also encouraged to apply.
