

Procedure on how to connect your Mac OS to join Guest Profile (SPGuest)

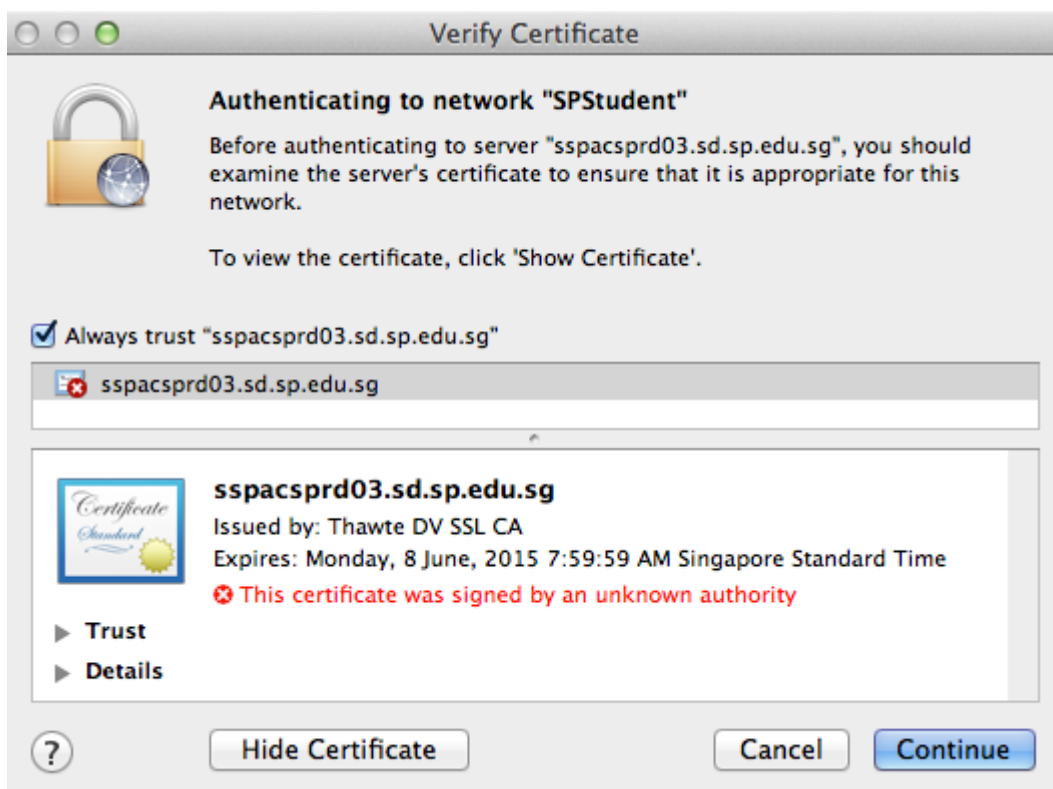

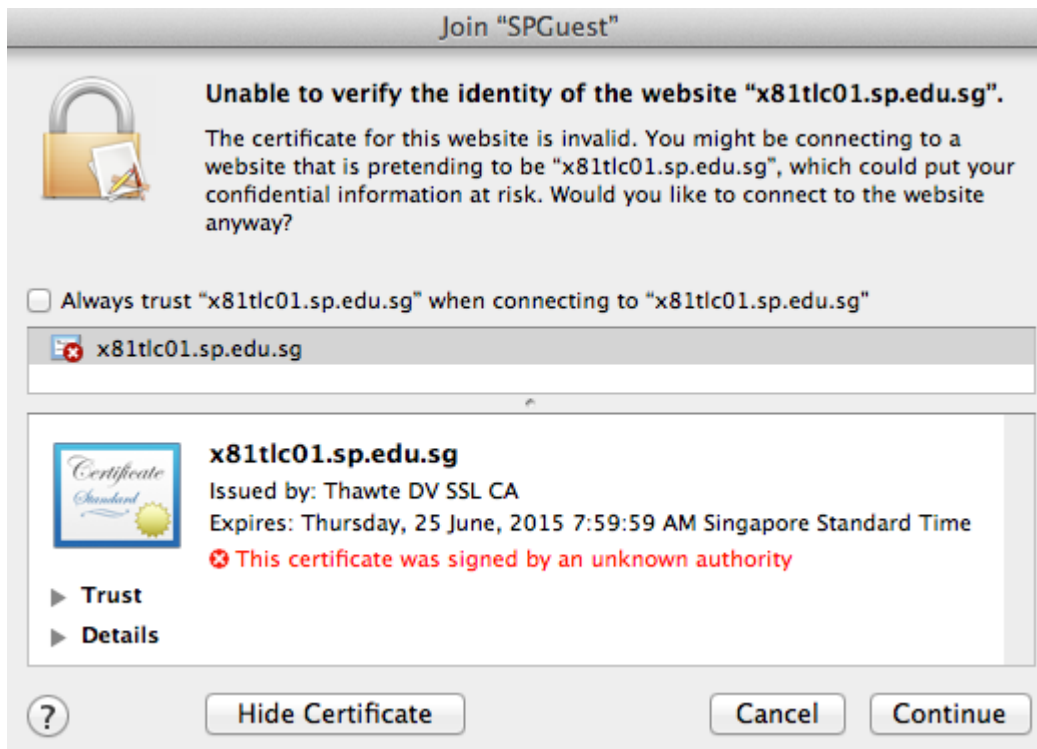

Step 1 – Click on the “Airport icon” and select “SPGuest” from the drop down menu. Then click on “Open Network Preferences”.

Step 2 – Airport network status shows Connected and an IP address is being issued.

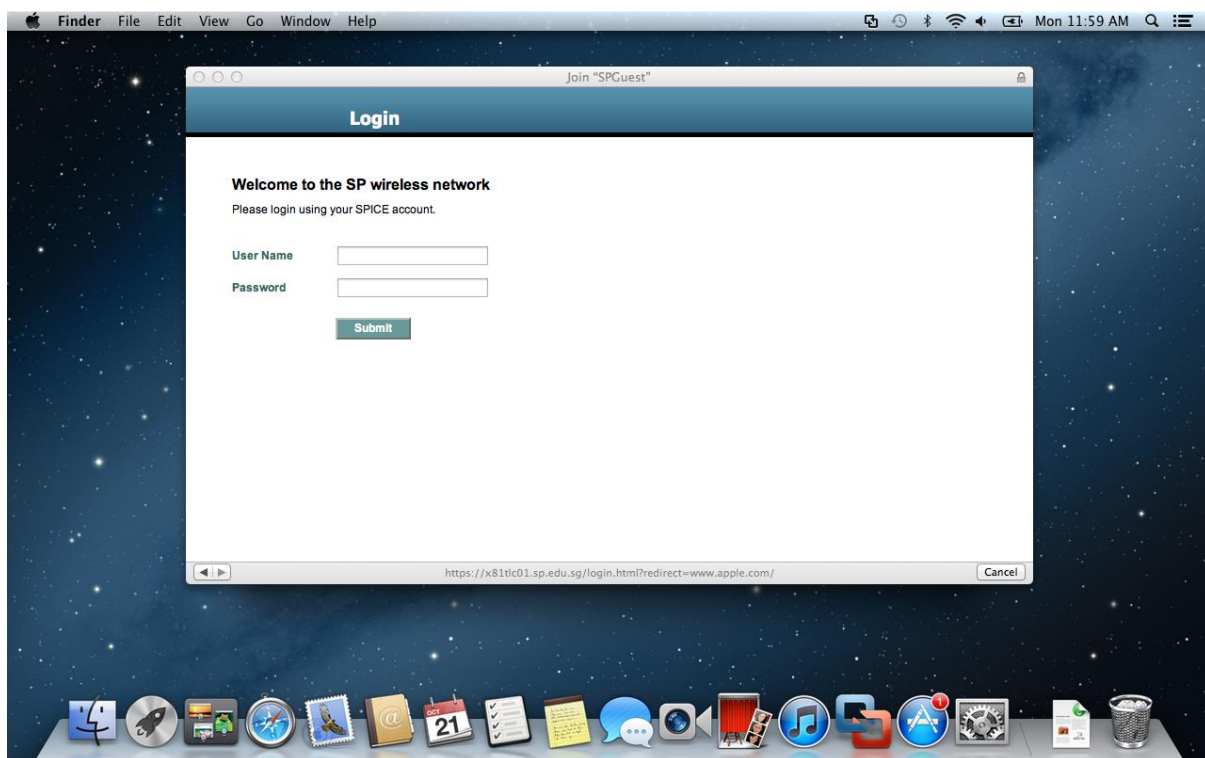

Step 3 – Launch Safari, when prompted with certificate pop up alert, click “Show Certificate” and check “Always trust x81tlcxx...” Click “Continue”

Step 4 – Key in your administrator password for keychain, the certificate will then be installed. Click “Update Settings” to proceed.

Step 5 – You will be re-directed to a Cisco authentication page, key in your SPICE User ID and Password to have access to the Internet.

Step 6 – Launch Safari to access the Internet
