

## SPEAR Modules:

Module Code	Name	Acronym	Hours	Yr/Sem	Module Synopsis
LCXX60 ABE: <a href="#">LC0160</a> CLS: <a href="#">LC0260</a> EEE: <a href="#">LC0360</a> MAE: <a href="#">LC0560</a> SMA: <a href="#">LC0660</a> SB: <a href="#">LC0760</a> SOC: <a href="#">LC0860</a> MAD: <a href="#">LC1060</a>	Critical and Analytical Thinking	CAT	30	Year 1 Sem 1	This module aims to equip students with skills in critical and analytical thinking, which include the ability to evaluate different perspectives, articulate a point of view and support it with relevant and credible evidence. The module also provides students with opportunities to practise information literacy, and critical and analytical thinking through the exploration of contemporary local and global issues.
LCXX61 ABE: <a href="#">LC0161</a> CLS: <a href="#">LC0261</a> EEE: <a href="#">LC0361</a> MAE: <a href="#">LC0561</a> SMA: <a href="#">LC0661</a> SB: <a href="#">LC0761</a> SOC: <a href="#">LC0861</a> MAD: <a href="#">LC1061</a>	Narrative Thinking	NAT	30	Year 1 Sem 2	This module aims to equip students with the skills to critically evaluate the elements of narratives used in a variety of contexts, and to appreciate and harness the power of storytelling in our daily life. Students will analyse narratives to connect and contextualise self to society, and learn to craft impactful personal narratives to inspire or influence others.
LC8062	Social Innovation Project	SIP	45	Year 2 Sem 1 or 2	This module aims to equip students with a Design Thinking mindset in a social innovation context. Students collaborate in multi-disciplinary groups to apply Design Thinking tools and methods to create innovative prototype solutions for local social issues. In the process, they will develop a better understanding of themselves, and empathy for a local community in need.

LC8063	Overseas Social Innovation Project	OSIP	45	Year 2 Sem 1 or 2	This module aims to equip students with a Design Thinking mindset in a social innovation context. It is a module equivalent of LC8062 where selected students will undergo the module in an overseas context. Students collaborate in multi-disciplinary groups to apply Design Thinking tools and methods to create innovative prototype solutions for overseas social issues. In the process, they will develop a better understanding of themselves, and empathy for an overseas community in need.
