

Module 3 – Engineering Drawings

Course Introduction	This course provide participants with the knowledge of different types of engineering drawings, namely Process Flow Diagram and Piping and Instrumentation Diagram. Participants will be able to interpret engineering diagrams and perform line tracing. This will enhance their job role as process technician when performing routine process units and utilities operations.
Course Objective	By the end of the course, participants will be able to: <ul style="list-style-type: none">• Interpret process engineering drawings• Perform line tracing using process engineering drawings
Course Outline	Topics include: <ul style="list-style-type: none">• Types of process engineering drawings and their purpose• Interpretation of engineering drawings• Performing line tracing using engineering drawings
