

EVF SG Supply Chain Analyst (Career Conversion Programme)

Mission

Sanofi Vaccines Industrial Affairs (VIA) is preparing for its future through an ambitious program called the Evolutive Vaccine Facility (EVF). The EVF project is a cornerstone of Sanofi's strategy of creating a new manufacturing concept consisting of a new generation of evolutive, modular, adaptable, and agile multi-product facilities that take advantage of new disruptive technologies to meet the challenges of the vaccine industry.

The Singapore EVF Supply Chain Analyst is responsible for providing data-driven insights to improve the overall site supply planning and logistics processes. Focusing on supply chain resilience and adaptability to manufacture any product needed from Phase II/III clinical trial material to commercial supply to the market, the analyst will work closely with production, manufacturing technology, engineering, safety, and quality teams to implement a fit-for-purpose supply & logistics operating model. The analyst will be heavily involved in SAP/ERP system rollout and master data preparation during the project phase.

Key accountabilities

- Support the Supply Chain Leader in designing and implementing fit-for-purpose supply & logistics strategies based on processes, products, and internal/suppliers' capabilities.
- Manage relevant supply planning and material master data to ensure and maintain excellent master data accuracy. During the project phase, function as the supply chain user representative during SAP/ERP implementation to setup the master data, define planning parameters, perform user acceptance testing and develop training packages to allow the retention and sharing of knowledge
- Design and set up reporting metrics for internal performance monitoring and external service providers, such as on-time delivery rates, order fulfillment rates, or inventory turns.
- Derive actionable insights and interpret data on logistics elements, such as availability, maintainability, reliability, supply chain management, strategic sourcing or distribution, supplier management, or transportation.
- Ensure adherence to cGMP as well as all Sanofi Quality, Safety, and Compliance requirements

Education and experience

- Bachelor's degree or equivalent in a Science, Engineering, Business, or Supply Chain discipline
- Experience with ERP systems preferred
