

Frequently Asked Questions (FAQs)

1. *Is this Specialist Diploma in Robotics & Automation (Advanced Robotics Application) designed for advanced learners?*

For this specialist diploma, the theoretical fundamentals and knowledge are still pegged at diploma level with the focus on practical applications of smart robotics and flexible automation systems to support i4.0 transformation journey undertaken by enterprises. Learners will undergo practical hands-on training and acquire the relevant experience that will expose and equip them well to be competent in the application and implementation of such smart systems.

2. *If I have no experience in robotics and automation, can I take this course? And will I be able to manage the learning and assessment?*

The minimum entry requirement for this course is a diploma graduate preferably in the field of engineering. With no prior experience in the area of robotics or automation, learners will still be able to cope due to the applied nature and practical approach adopted in the course curriculum. For non-related field applicants, relevant working experience or supporting evidence of competency readiness in the field of study will be considered.
