

Freshman Orientation Programme 2022

School of
Electrical and Electronic Engineering

Welcome Message by Dr Lim Joo Ghee, Ag Director – School of Electrical and Electronic Engineering

Dear Students,
Congratulations on being accepted into SP's School of Electrical and Electronic Engineering (EEE), one of Singapore's premier schools of engineering education. This is a significant chapter in your life as you are transiting from secondary school to tertiary education where you have chosen to join one of our four diploma courses that are well regarded by the industry as well as both local and overseas universities.

To begin with, I encourage you to adopt a positive learning mind-set, be passionate about developing deep skills of mastery in engineering and be excited about what awaits you in SP. Embrace your experiences and take advantage of every opportunity to discover your strengths, talents and giftedness.

It is SP's vision to see each student shaped, molded and developed into an inspired learner with holistic perspectives, one with strong engineering knowledge and skills to serve with mastery and care for the community. The school believes in helping its students fulfil their potential, nurturing their curiosity about how things work, strengthening their ability to learn how to learn and inculcating in them the spirit of lifelong learning. We are committed to your growth with us. We have invested much time and effort in designing a curriculum that is holistic, self-directed, and which promotes entrepreneur vigour and meta-learning. We have introduced pathways such as Electives, Specialisation, Enhanced Internship and ACE Programme within our course for you to be challenged and developed further according to your interests. With pedagogies like the CDIO (Conceive, Design, Implement and Operate) framework and Design Thinking, you will be trained on how to solve real-life engineering problems, speak with confidence and think critically while working with others.

EEE's strong collaboration with relevant industries has ensured that up-to-date equipment and facilities are in place to support the teaching and learning of fast emerging engineering disciplines. Apart from this, our industry partners are involved in curriculum determination and delivery, and our students given ample opportunities to participate in learning from industry. This is all part of our thrust to augment real world learning in our students so that they will be prepared for industry standards and practices when they graduate.

To broaden your horizons, I hope that you would explore beyond your curriculum by being involved in various activities such as sports, arts, overseas learning trips and service to the communities. Through such activities, you would get to interact and bond with your fellow schoolmates, develop valuable social, interpersonal and leadership skills.

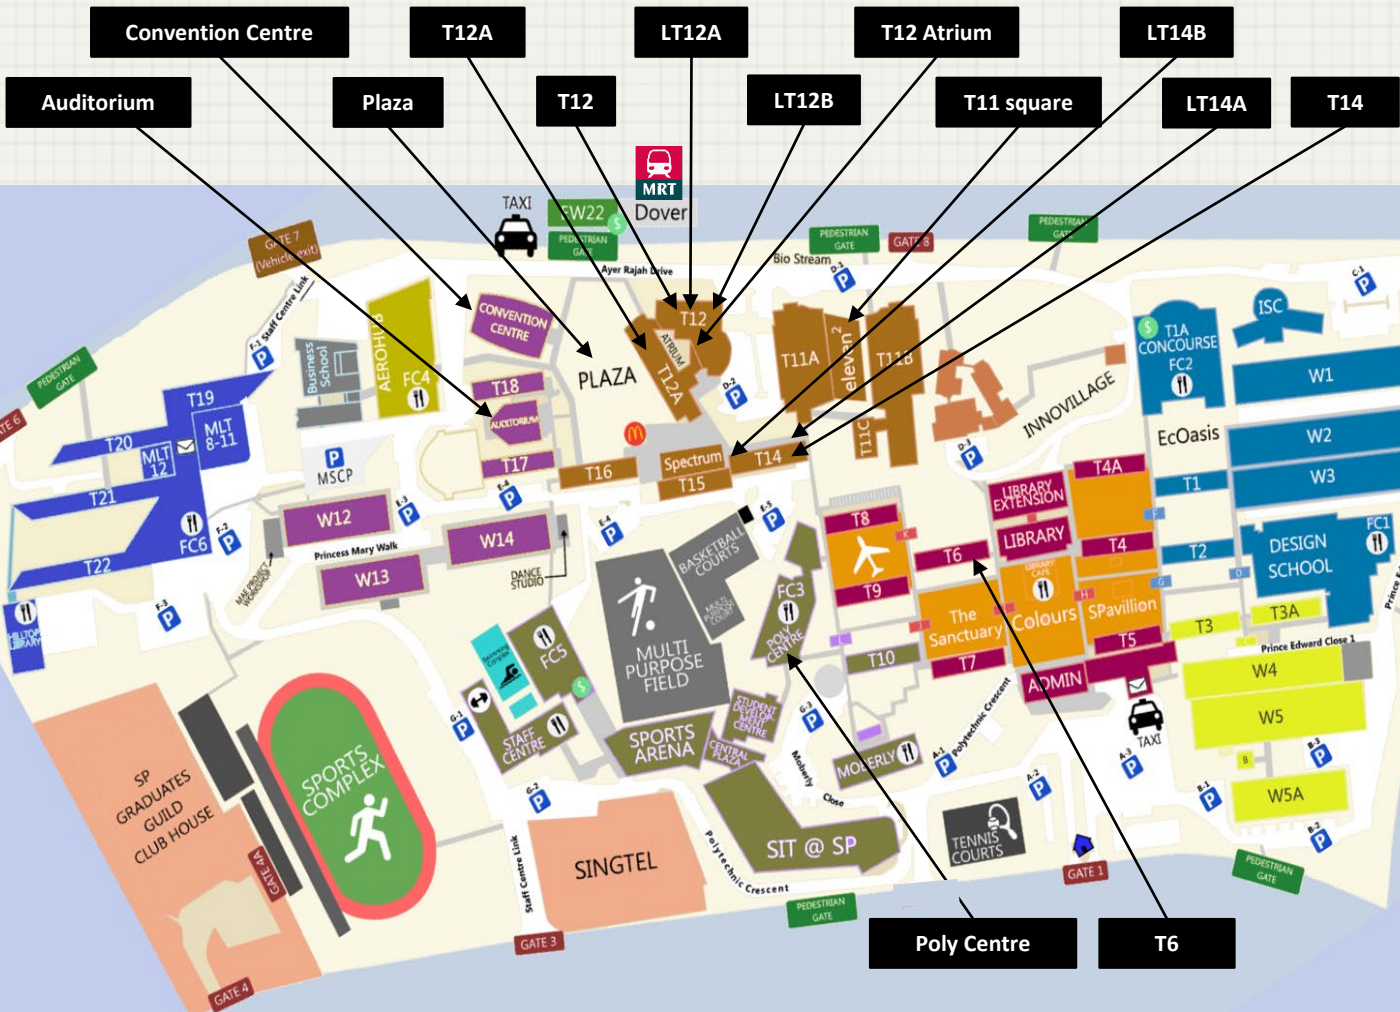

This new transition may seem as daunting as it is exciting, challenging and empowering. Do not worry. You will have dedicated lecturers to journey with you throughout the 3 years in EEE. The desired outcome is to nurture in you, the mindset, skillsets and behaviour, in short, the desired Graduate's Attributes, that will render you to be more life ready, work ready and world ready, and enable you to stay resilient in the face of an ever-changing future. I invite you to embark on this mission with your lecturers and peers as it is the aim of the school to nurture curious minds and produce passionate engineers – a journey to bring each of you from Potential to Fulfilment. I wish you every success and am confident that you will find your journey in SP an immensely rewarding experience.

Thank you.

Lim Joo Ghee

About the School of EEE

- School of EEE has produced more than 30,000 alumni over the last 60 years
- Currently School of EEE offers 4 Diploma courses
- It has about 116 highly qualified and experienced academic staff
- More than 2400 full time students are enrolled in its courses
- The school is active in technology development and collaborating with industries and research institutions. Eight tech hubs have been set up to support these activities.
 - Aerospace Engineering Hub
 - 5G & AIoT Technology Hub
 - Technology to Business Hub
 - Robotics, Automation & Control Hub
 - Power & Sustainable Energy Hub
 - Semicon & Electronics Hub
 - Biomedical Engineering Hub
 - Autonomous & Transportation Systems Hub
- Students of the School have consistently performed well at both national and international competitions such as WorldSkills Competition, International Standards Olympiad and RoboCup SGOpen, attesting to the high quality of training that the School of EEE provides.
