Quotes from Year 3 Students:

“It was good to know that I have a spot in the course that I dreamt for even before I sat for my O- level exam. It became my motivation to do better for my O-levels so as to join SMA.” **Nur Aliah Atiqah Binte Abdul Aziz, Year 3, Diploma in Marine Engineering**

“The information I read up from the SP website were very useful for the EAE aptitude tests and interview. The tests basically test your knowledge of the courses and some general knowledge about the industry which also can be easily found through maritime websites.” **Shwe Yi Kyaing, Year 3, Diploma in Maritime Business**

“Ever since secondary school I wanted to join the nautical career as I had a fascination for the sea, I had done much research on the job of a seafarer and this further energised me to be part of DNS. At an SMA outreach event I was advised to join via EAE, since EAE looks at your passion and aptitude for the course instead of academics. I was able to secure a position in poly even before O levels. Now, I have sailed around the world more than twice and visited over 20 countries during my internship and am happy to be part of the vibrant maritime industry.” **Theseira Keane Ralph, Year 3, Diploma in Nautical Studies**
