DSO: LIKE NO OTHER

WE SAY

Achieve your full potential with the DSO Diploma Scholarship. Check out what our scholarship recipients, Kimberlyn, Daniel and Dylan, have to share.

Kimberlyn Loh
Ngee Ann Polytechnic

Q: I chose the DSO Diploma Scholarship because...

A: My course focuses more on R&D, unlike traditional engineering courses that centre on technical aspects. This DSO scholarship is an excellent opportunity to witness and learn how R&D is performed in the real world. I also strongly believe that DSO, as the one-and-only defence R&D organisation in Singapore, can provide me with invaluable experience and knowledge that no polytechnic classroom would be able to.

Daniel Ho
Singapore Polytechnic

Q: The DSO Diploma Scholarship is...

A: A dream come true! I have always been attracted to defence R&D as I find it very interesting to be able to explore emerging technologies, exploit them to their fullest potential to develop innovative solutions. I am also enticed by the dedicated internship programme where I can explore the wonders of research work, while having an experienced researcher as my mentor to guide me. This scholarship is a promising start for my R&D adventure ahead!

Dylan Hoi
Temasek Polytechnic

Q: My advice for scholarship seekers:

A: If your passion lies in science and engineering, go for the DSO Diploma Scholarship! Defence R&D is an exciting field that puts you at the forefront of science and technology. It is an eye-opening experience and you will be amazed when you get to partake in a major project in DSO which is beneficial towards your participation in the World Skills Singapore competition or your 3rd year project. Not forgetting the fun factor where you get to participate in many exciting corporate and recreational activities in DSO!
