

## ***AEC Visit Series to KB Associates***

As part of the Adult Educator's Community (AEC) Visit Series, a group of adjunct lecturers and PACE staff visited KB Associates, particularly their training facilities on 28 November 2016. The intent of the visit was to learn best practices from a commercial training company in how they carry out training keeping in mind industry needs. The KBA Training Centre represents the training arm of KB Associates Group focusing on accredited safety training for onshore and offshore industries making it a premier destination for specialised international and national training programmes.

The presentation by Mr. Darren Brunton, Managing Director of the KBA Group of Companies and the 'B' in KBA was impressive showing how determined the company was to ensure that they provide the best quality training to their customers and clients. KBATC has received full accreditation by ISO 9001:2008, OHSAS 18001:2007 and ISO 29990.

The tour of their facilities including their newly setup deep water diving training facility at Toll Offshore Petroleum Services' offshore supply base at Loyang was interesting. The visit gave adjunct lecturers and PACE staff a greater perspective of the commercial training scene and the need to keep ahead of the evolving training landscape.
